Hi ******,

It was wonderful to talk to you just now! Below are the interview preparation materials I mentioned on our call.

Next Steps
To get you set up for your interview, please reply with the following -
(1) Your updated resume,
(2) the names of anyone you know who works at Google, either socially or professionally, and
(3) your interview availability for a 45-minute phone interview (please provide at least 5 dates, and your availability between 9am-5pm PST each day).

Once you've replied with those items, I can submit your interview availability. After that, you will receive an email from one of my colleagues setting up the day and time of this call.

As we discussed, the first step is a 45-minute phone interview with an engineer who will present coding problems to you via a shared Google doc. The interviewer will be evaluating your:

- Coding ability in C#
- Problem solving & communication skills
- Your knowledge of data structures & algorithms

Interview Preparation
Here are a few helpful resources that engineers have shared with us:

- Interview Prep (attached): Includes links, a video, and also a few practice problems
- Practice coding in a Google Doc
- Practice Your Code
    - Project Euler
    - Topcoder
    - HackerRank
    - LeetCode
- Data Structures and Algorithms
    - Data Structures and Algorithms
    - 500 Data Structures and Algorithms
    - Top 10 Algos in Interview Questions
    - Big-O Cheat Sheet
- General Interview Prep
    - GeeksforGeeks
    - Interview Puzzles
    - Practice Problems - Google Focused
- "Life at Google" Video Series
    - Overview of the Hiring Process
    - Preparing for a Google Engineering Interview
    - Mock Coding/Engineering Interview

If you have any questions or concerns as you look over these materials and prepare info for next steps, please don't hesitate to reach out.

Thank you!
